Han Joon Byun

120, Seolleung-ro, Gangnam-gu, Seoul, Republic of Korea, 06289
010-9963-7660 | byunhanjoon@gmail.com

EDUCATION

Seoul National University **Seoul, Republic of Korea**
PhD in Computer Science and Engineering Expected 2027
Optimization and Financial Engineering Lab (advisor: Prof Byung-ro Moon)

Seoul National University **Seoul, Republic of Korea**
MS in Computer Science and Engineering 2024
Optimization and Financial Engineering Lab (advisor: Prof Byung-ro Moon)

New York University **New York, USA**
Bachelor of Science in Mathematics 2018

WORK EXPERIENCE

Seoul National University **Seoul, Republic of Korea**
Joint Research Projects, Optimization and Financial Engineering Lab *2022–2026*

- Research in machine learning, financial prediction, and interpretable models.
- Selected Project Experience:
  - Agency for Defense Development (2026)
    - Contributed to interpretable-model research.
  - PFCT (2025)
    - Developed a default-prediction model using tabular Transformers.
  - Think Pool (2022–2024)
    - Developed AI-driven financial factors for quantitative finance.

Head Teaching Assistant, Seoul National University *2023–2026*

- Data Structures: Spring 2023, Fall 2024 and 2025; Algorithms: Fall 2023, Spring 2025 and 2026.
- Prepared course materials, supported students, coordinated TAs, and graded coursework and exams.

Republic of Korea Air Force **Daegu, Republic of Korea**
Interpretation Officer *June 2019 – May 2022*
