

Han Joon Byun

120, Seolleung-ro, Gangnam-gu, Seoul, Republic of Korea, 06289
010-9963-7660 | byunhanjoon@gmail.com

EDUCATION

Seoul National University <i>PhD in Computer Science and Engineering</i> Optimization and Financial Engineering Lab advised by Prof Byung-ro Moon	Seoul, Republic of Korea Expected 2027
Seoul National University <i>MS in Computer Science and Engineering</i> Optimization and Financial Engineering Lab	Seoul, Republic of Korea 2024
New York University <i>Bachelor of Science in Mathematics</i>	New York, USA 2018

WORK EXPERIENCE

Seoul National University <i>Joint Research Projects, Optimization and Financial Engineering Lab</i> - Research in machine learning, financial prediction, and interpretable models. - Selected Project Experience: - Agency for Defense Development (2026) - Contributed to interpretable-model research. - PFCT (2025) - Developed a default-prediction model using tabular Transformers. - Think Pool (2022–2024) - Developed AI-driven financial factors for quantitative finance.	Seoul, Republic of Korea 2022–2026
Republic of Korea Air Force <i>Interpretation Officer</i>	Republic of Korea June 2019 – May 2022
